CS 171/CSCI E-64: Visualization
Homework 5, Group Reflections

James Goodspeed – jgoodsp@fas.harvard.edu

I had the assistance of Devin Shackle with reviewing my submission for Homework #5. I did not have really any changes for my submission, though Devin did give me some helpful hints on the tool tip for canvas graph.

Devin also had a good alternate visualization for question #3 in the reading assignment. I thought his use of a Parallel Coordinates graph was a good choice, thought I believe that my original choice of small multiples is also a good choice.
